# MISP ZERO MQ

2022-08-03

MISP Dashboard  
└─ MISP ZeroMQ

MISP ZERO MQ

MISP includes a flexible publish-subscribe model to allow real-time integration of the MISP activities:

- Event publication
- Attribute creation or removal
- Sighting
- User login

→ Operates at global level in MISP

└─ MISP ZeroMQ

MISP includes a flexible publish-subscribe model to allow real-time integration of the MISP activities:

- Event publication
- Attribute creation or removal
- Sighting
- User login

→ Operates at global level in MISP

MISP ZeroMQ functionality can be used for various model of integration or to extend MISP functionalities:

- Real-time search of indicators into a SIEM<sup>1</sup>
- Dashboard activities
- Logging mechanisms
- Continuous indexing
- Custom software or scripting

---

<sup>1</sup>Security Information & Event Management

# MISP-DASHBOARD: ARCHITECTURE AND DEVELOPMENT

# SETTING UP THE DASHBOARD

1. Be sure to have a running redis server: e.g.
  - ▶ `redis-server -p 6250`
2. Update your configuration in `config.cfg`
3. Activate your virtualenv:
  - ▶ `. ./DASHENV/bin/activate`
4. Listen to the MISP feed by starting the `zmq_subscriber`:
  - ▶ `./zmq_subscriber.py`
5. Start the dispatcher to process received messages:
  - ▶ `./zmq_dispatcher.py`
6. Start the Flask server:
  - ▶ `./server.py`
7. Access the interface at `http://localhost:8001/`

## RECENT CHANGES IN THE MISP-DASHBOARD

- MISP authentication can now be used in the misp-dashboard
- Improved TLS/SSL support in the default misp-dashboard
- Self-test tool to debug and test ZMQ connectivity

2022-08-03

### MISP Dashboard

#### └─ MISP-Dashboard: Architecture and development

#### └─ Recent changes in the misp-dashboard

- MISP authentication can now be used in the misp-dashboard
- Improved TLS/SSL support in the default misp-dashboard
- Self-test tool to debug and test ZMQ connectivity

Optimizing contribution scoring and model to encourage sharing and contributions enrichment

Increasing geolocation coverage

Global filtering capabilities

- Geolocation: Showing wanted attribute or only on specific region
- Trendings: Showing only specified taxonomies

Tighter integration with MISP

- Present in MISP by default
- ACL enabled version

- Optimizing contribution scoring and model to encourage sharing and contributions enrichment
- Increasing geolocation coverage
- Global filtering capabilities
  - Geolocation: Showing wanted attribute or only on specific region
  - Trendings: Showing only specified taxonomies
- Tighter integration with MISP
  - Present in MISP by default
  - ACL enabled version

MISP-Dashboard can provides realtime information to support security teams, CSIRTs or SOC showing current threats and activity by providing:

- Historical geolocalised information
- Geospatial information from specific regions
- The most active events, categories, tags, attributes, ...

It also propose a prototype of gamification of the platform providing incentive to share and contribute to the community
